

PIPEFAB HE/ME (HYDRAULIC / MASTER EDITION)

The client-server system offers a complete software solution for planning and organizing process flows in plant piping and pipeline construction. It is used by the shipyard and offshore industry as well as by companies from the power plant, plant construction and industrial pipeline construction. Our software solutions are complemented by an extensive program for technical customer support.

FUNCTIONALITY	PIPEFAB HE (HYDRAULIC EDITION)	PIPEFAB ME (MASTER EDITION)
Project management	X	X
Master data management and maintenance	X	X
Single-user installation / client-server installation	- / X	- / X
Creation of single pipe isometrics / strand isometrics	X / X	X / X
Calculation and output of bending data	X	X
Testing of clamping lengths, initial and final lengths	X	X
Creation and transfer of NC bending data	0	0
Bending simulation with graphic display	0	0
Import of CSV data / Export of CSV data	0 / 0	0 / 0
Interface for importing CAD data (.pcf, .STEP, .IGES)	0	0
3D representation of the pipe run	X	X
Branch components (detachable connections)	X	X
Isometry parts exchange	X	X
Fittings, tees, father-son parts	X	X
Output of parts lists and cutting lists	X	X
Creation of production lots	0	X
Welding components (non-detachable connections)	-	X

X = Standard
0 = Option
- = Not included
